PROJECT

Fusion-Based Sentiment Analysis for Evaluating ECommerce Product Experience

2025

- Designed and implemented a fusion-based sentiment analysis system combining lexicon-based and machine learning approaches to evaluate customer product experiences on e-commerce platforms.
- Collected and preprocessed large-scale customer reviews using text cleaning, tokenization, stop-word removal, and lemmatization
- Classified reviews into positive, negative, and neutral sentiments to assess overall product experience.
- Evaluated performance using accuracy, precision, recall, F1-score, and confusion matrix.
- Demonstrated how sentiment insights can support product quality improvement, customer satisfaction analysis, and business decision-making.

INTERNSHIP
